Recall API - Roadmap for Operation and Functionalities

The Recall API provides delivery of content of type Recall in JSON format. The content can be filtered by several types of fields that compound that content type.

The complete solution also includes an administrative page that helps the administrator to build the set of parameters that will compound the request for filtering purposes.

API endpoint

`fsis/api/recall/v/1`

The complete URL is: https://www.fsis.usda.gov/fsis/api/recall/v/1

Sample results of an unfiltered request:

Beautified output of a request from a Firefox browser:

Filters and Search:

After the filter is applied, the resulting URL is:

https://www.fsis.usda.gov/fsis/api/recall/v/1?field_states_id=All&field_archive_recall=All&field_closed_date_value=&field_closed_year_id=All&field_risk_level_id=All&field_processing_id=All&field_product_items_value=meat&field_recall_classification_id=All&field_recall_number=&field_recall_reason_id=All&field_recall_type_id=All&field_related_to_outbreak=All&field_summary_value=&field_year_id=All&field_translation_language=All

"field_recall_number" for searching text included in "Recall Number" - 021-2022 and "field_summary_value" for searching text included in "Summary" – any text in the recall release body.

Name	Parameters	Types	Value format
Archive recall	field_archive_recall	Selection	
Closed date	field_closed_date_value	Text	YYYY-MM-DD(ex: 2023-07-18)
Closed year	field_closed_year_id	Selection	
Processing Category	field_processing_id	Selection	
Product Items	field_product_items_value	Text	include the text but Not exact match
Recall classification	field_recall_classification_id	Selection	
Recall number	field_recall_number	Text	DDD-YYYY(Ex: 021-2023)
Recall reason	field_recall_reason_id	Selection	
Recall type	field_recall_type_id	Selection	
Related to Outbreak	field_related_to_outbreak	Selection	
Health risk level	field_risk_level_id	Selection	
Affected states	field_states_id	Selection	
Summary	field_summary_value	Text	include the text but Not exact match
Translation language	field_translation_language	Selection	
Issue Year	field_year_id	Selection	

All filters not being used also produce parameters in the URL. Like: **field_archive_recall=All**.

However, they can be ignored. The URL for the API can be built with the parameters with identifiers: **field_states_id=33** and **field_closed_year_id=446**.

The request to the API would be:

```
/fsis/api/recall/v/1?field_states_id=33&field_closed_year_id=446
```

The complete URL would be:

https://www.fsis.usda.gov/fsis/api/recall/v/1?field_states_id=33&field_closed_year_id=446
